This initiative is a European-wide project and one of its main goals is to foster a greater knowledge on the impact of energy poverty.

The [European Anti-Poverty Network \(EAPN\)](#) has started working on this project together with **10 organisations** from Belgium, Finland, Italy, Poland, Spain and the United Kingdom. It will last **three years** and is funded by the European Commission within the framework of the [Horizon 2020 programme](#).

Together4Energy is developed based on the need to further strengthen consumer rights, especially those of people living in a situation of **energy poverty and vulnerability**.

To improve the level of **empowerment and commitment**, and in light of the growing complexity of the energy market, the project aims at informing on how the problem is being dealt with and how to identify **needs and best practices**, as well as fostering a greater knowledge on **energy poverty** in Europe.

With the name **VCEA**, the intention is to also establish a **European network that can provide advice to vulnerable consumers**, with a support infrastructure for professional development. This network will promote the hiring of people who have direct experience in energy poverty and vulnerability.
